Processor: Pentium compatible - 133 MHz or higher

Language Support

English, other languages available on request: email sales@avocosecure.com

secure2signXL:

- ✔ Allows sectional signing of Excel spreadsheets and forms (enabling close linking to workflow)
 - Sign range of cells
 - Sign individual worksheets
 - Sign entire workbook
- ✔ Supports multiple signatures
- ✔ Time stamp support through trusted time authority
- ✔ Does not use ActiveX controls, macros or Visual Basic code. The ability to sign without introducing active content:
 - ✔ Eliminates the possibility of active content being maliciously exploited.
 - ✔ Prevents the problem of firewalls filtering out documents with active content.
 - ✔ Avoids conflicts with using documents with active content in secure environments.
 - ✔ Ensures compatibility with Microsoft Office 2007 default native file formats (.docx) that specifically exclude any active elements (ActiveX, scripts or macros).
