

Supported Operating Systems

Windows XP Pro
Windows 2000
Windows Vista support available on release of Vista

Supported Applications

Office 2007
Office 2003
Office XP
Office 2000
Adobe Acrobat Reader
Other application support available ask for list

SharePoint 2003
Documentum eRoom
Hummingbird portal
Intralinks
Groove

API available

Supported File Formats

Word (.doc)
PowerPoint (.ppt)
Excel (.xls)
RTF
PDF
Application Support Wizard allows support for other file formats, ask for further information

Encryption Algorithm

Rijndael 256-bit AES algorithm
(Advanced Encryption Standard)

Minimum System Requirements

Memory: ideally 512 megabytes of RAM
Hard Disk: 2 megabytes of free space
CPU Support: Single CPU Systems
Processor: Pentium compatible - 133 MHz or higher

DRM Controls

- No print
- No content copying
- No editing (except forms)
- Read Only
- No access until...
- Expire after...
- Document signing / time-stamping (secure2sign)
- Watermarking

Authentication Methods

- Active directory / NT Domains
- Digital certificate (incl. smart cards, USB tokens, etc)
- Site location code
- Secure Teams
- Password
- Anyone

Application of the restrictions

- The same restrictions whatever authentication is used.
- Individual restrictions depending on the authentication method. For example, if both password and active directory authentication are set then 'no printing' and 'no copying' could be enforced if password authentication was used but only 'no printing' when membership of an active directory group was used.
- Individual restrictions within an authentication method. For example, if active directory is used for authentication, each member or group selected may be given individual restrictions.
